**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 01 February 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-3,5-8,10-12,14-19,21-23,25-31,33 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Safarevich in U.S. Patent No. 6,061,595 in view of Schwemmer et al. in Japan Patent No. 2001-229,985 or Swarts et al. in U.S. Patent No. 4,714,815. Safarevich discloses a method of making a medical device by laser welding an elongated shaft (element 48) to a helical coil (element 36) and then cooling but Safarevich uses a laser beam to create fusion bonds by melting both workpieces. Schwemmer et al. teach only melting the workpiece (10) with the lower melting point temperature to bond to the workpiece (element 20) with the higher melting point temperature. Alternatively Swarts et al. teach melting a first workpiece made of KOVAR

(melting point of 2700 degrees Fahrenheit, see column 3,line64) to cause it to bond to a workpiece made of tungsten (which has a higher melting point of 6200 degrees Fahrenheit, see column 3,lines 63-64). It would have been obvious to adapt Safarevich in view of Schwemmer et al. or Swarts et al. to provide this to create a mechanical bond without having to expend the necessary energy to melt the workpiece (connector 52) with the higher melting point or larger metal mass, thereby making the bonding process more energy efficient.

4. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geoffrey S. Evans whose telephone number is (571)-272-1174. The examiner can normally be reached on Mon-Fri 7:00AM to 3:30 PM (flexible).
